INDEX TO VOLUME XLIII

Page numbers preceded by "(P)" refer to the summaries of papers at the meetings of the British Thoracic Society; for these only the first author is indexed. "(E)" refers to editorials.

A

ABBOUD R. *See* CHAN-YEUNG M, ABBOUD R, *et al*
ABE T. *See* ASAOKA M, IMAIZUMI M, *et al*
ABER VR. *See* SUTEDJA TG, APPERLEY JF, *et al*
Abscesses, pulmonary, due to *Candida* complicating parenteral nutrition, case of, 418
Acanthosis nigricans associated with alveolar cell carcinoma, case of, 414
Acetazolamide, effects in sleep apnoea syndrome, 113
N-Acetyl cysteine ingestion, plasma and bronchoalveolar lavage fluid cysteine and glutathione concentrations after (P), 821
Achalasia, oesophageal, fatal *Mycobacterium fortuitum* infection associated with, case of, 151
Acid phosphatase, tartrate resistant, diminished activity in alveolar macrophages from patients with active sarcoidosis, 901
Acinar unit size and number, dichotomy within population in? (P), 257
ADAMSON IYR, KING GM, BOWDEN DH: Collagen breakdown during acute lung injury, 562
ADDIS BJ. *See* SHEFFIELD EA, MOORE-GILLON J, *et al*
Adenoma, bronchial, laser photoresection in preoperative assessment of case of, 741
Adenosine, bronchoconstriction induced by, role of felodipine (calcium antagonist) (P), 867
Adenosine-5'-monophosphate, airway responsiveness to, after hypertonic saline challenge in asthmatic subjects (P), 835
  bronchoconstriction induced in non-atopic asthma by, inhibition by sodium cromoglycate and nedocromil sodium (P), 225
Adrenaline and noradrenaline concentrations, circulating, during exercise in patients with exercise induced asthma and normal subjects, 295
  versus terbutaline, subcutaneous, in treatment of acute severe asthma, 19
Aerosol challenge of varying tonicity and ionic content, effect on nasal potential difference (P), 234
  challenge with sensitising antigen, effect on permeability of surface of rat trachea in life, 1007
  deposition, effect of spacer size and inspiratory flow rates (P), 815
  deposition rate, pulmonary, effect of high frequency oscillations (P), 815
  drug delivery, pulmonary, improvement of (P), 814
Aerosols, bronchodilator, particle size of, effect on lung distribution and pulmonary function in chronic asthma (*Letter*), 159
AERTS C. *See* WALLAERT B, BART F, *et al*
AFFORD SC, *et al*: Synthesis of α_1 proteinase inhibitor by the promonocytic U937 cell line (P), 820
AGNEW J. *See* STEAD RJ, HOULDER S, *et al*
AGNEW JE. *See* CURRIE DC, GREENSTONE M, *et al*
AGUSTI-VIDAL A. *See* PICADO C, CASTILLO JA, *et al*
AHMAD F. *See* CAPEWELL S, MCLEOD DT, *et al*
AIDS and HIV positive patients, attitudes of respiratory physicians to (P), 849
  bronchoalveolar lavage cells in patients with (P), 822
  cytomegalovirus in, respiratory pathogen or passenger? (P), 848
  HIV positive, and high risk patients, invasive procedures in, attitudes of respiratory physicians to (P), 849
  lung disease in, bronchoscopic diagnosis and implications for management (P), 229
  mycobacterial resistance to disinfection in, and effect on infection control policies (P), 850
  not cause of arrest in decline of tuberculosis notifications in England and Wales? (P), 244
  Pneumocystis carinii pneumonia in London patients with, natural history of (P), 848
  pneumonia in, empirical treatment justified? (P), 230
  pulmonary diseases in central African patients with (P), 846
  pulmonary pseudotumour due to *Corynebacterium equi* in patient with, 486
  See also HIV
Airflow limitation, chronic, acute exacerbations of, silent myocardial ischaemia during (P), 829
  limitation, chronic, protriptyline in (P), 253
  obstruction, acute, nebulised salbutamol in, to be given alone or with ipratopium bromide? (P), 844
  obstruction, chronic, anxiety, depression, walking speed and spirometry in (P), 858
  obstruction, chronic, bronchial responsiveness, lung mechanics, gas transfer, and corticosteroid response in, 916
  obstruction, chronic, combined bronchodilators in, trial of (P), 857
  obstruction, chronic, effects of captopril on pulmonary and renal function in (P), 832
  obstruction, chronic, exercise ability in, influence of supplemental oxygen, 965
  obstruction, chronic, exercise performance in, effect of additional weight (P), 254
  obstruction, chronic, hospital management of patients with diagnostic label of, comparison with uncomplicated asthma cases (P), 830
  obstruction, chronic, hypercapnic, external negative pressure ventilation in, physiological changes during (P), 232
  obstruction, chronic, long term home nebuliser therapy in, peak flow, heart rhythm, steroids, hospital admission and death in 391 patients during (P), 856
  obstruction, chronic, non-asthmatic, disease progression retarded by inhaled corticosteroids? (P), 857
  obstruction, chronic, oxygen in hypoxaemic patients with, symptomatic benefit of (P), 233
  obstruction, chronic, relation between FEV_1 and peak expiratory flow in, 335
  obstruction, chronic, reversibility in, assessment of (P), 231
  obstruction, chronic, reversibility in, clinical and laboratory correlates of (P), 232
  obstruction, chronic, severe, effect of franol on breathlessness and exercise tolerance in (P), 250
  obstruction, chronic, sleep in, effect of diazepam, 729
  obstruction, chronic, walking test results in, reproducibility of, 388; (*Letters*), 1025
  obstruction, chronic, with and without hypoxaemia, platelet size in, 61
  obstruction, steroids in, trial and reassessment (P), 856
  obstruction. *See also* Lung disease, obstructive
Airway blood flow distribution and oedema after histamine infusion in sheep (P), 235
  calibre and reactivity in asthma, dose related effects of salbutamol and ipratropium bromide on, 300
  calibre, starting, influence on slope of concentration-response curve to methacholine assessed by partial flow-volume loops (P), 219
  cholinergic activity, changes in, nocturnal asthma caused by?, 720
  cooling and drying, role in hyperventilation induced asthma, 289
  disease, obstructive. *See* Airflow obstruction
  function, effect of inhaled formyl-methionyl-leucyl-phenylalanine, 36
  guinea pig, contractile activities of lipoxin A4 and B4 on (P), 227
  inflammation in fatal asthma (P), 238
  obstruction. *See* Airflow obstruction
  reactivity, wheezing and lung function in gold miners, relation between (P), 818
  reflexes, human, effects of inhaled nicotine (P), 836

response to inhaled capsaicin in normal subjects, effect of nedocromil sodium, 935
responses to inhaled ouabain and effect of Na/K ATPase inhibition on histamine responsiveness in asthmatics (P), 868
responsiveness, changes in, and late asthmatic response, falls in blood eosinophils correlated with (P), 237
responsiveness in asthma, comparative effects of prednisone and beclomethasone dipropionate, 378
responsiveness in asthma, relation to number and activity of inflammatory cells in bronchoalveolar lavage fluid, 684
responsiveness to adenosine-5-monophosphate after hypertonic saline challenge in asthmatic subjects (P), 835
responsiveness to histamine and airway dysfunction in low birthweight children at school age (P), 258
responsiveness to hypertonic saline and methacholine after hypertonic saline challenge (P), 259
responsiveness to inhaled sodium metabisulphite, reproducibility and relation to methacholine (P), 865
responsiveness to methacholine in normal and asthmatic subjects, analysis of morning-evening changes using partial flow-volume curves, 727
smooth muscle from rabbit trachealis, tissue culture for study of intracellular calcium store (P), 233
smooth muscle. *See also* Tracheal smooth muscle
Airways, human, isolated, constriction to hypertonic Krebs buffer and pharmacological characterisation of response (P), 835
imaging by bronchoscintigraphy for study of mucociliary clearance, 360
normal and hyperreactive, pulmonary distribution and plasma pharmacokinetics of inhaled sodium cromoglycate in subjects with, effect of methacholine induced bronchoconstriction, 611
selectivity of atenolol (P), 831
small, obstruction in rheumatoid arthritis (P), 829
AITMAN TJ. *See* BAUDOUIN SV, AITMAN TJ, *et al*
ALBAZZAZ MK, PATEL KR: Effect of azelastine on bronchoconstriction induced by histamine and leukotriene C4 in patients with extrinsic asthma, 306
——, *et al*: Dose-duration effect of nebulised nedocromil sodium in exercise induced asthma (P), 832
——, *et al*: Dose-response relationship of nebulised nedocromil sodium in exercise challenge (P), 252
——. *See also* FARLEY RD, ALBAZZAZ MK, *et al*
Alfentanil for sedation for fibreoptic bronchoscopy, comparison with papaveretum and diazemuls (P), 805
AL-HASANI MK. *See* GUNAWARDENA KA, AL-HASANI MK, *et al*
AL-JARAD N, *et al*: Measurement of the transfer factor by the single breath method with a shorter breath holding time (P), 850
Alkaline phosphatase, placental, as tumour marker in pleural fluid, assessment of (P), 839
AL-KHADER AA. *See* GUNAWARDENA KA, AL-HASANI MK, *et al*
ALLEN MB: Intrathoracic infections due to *Eikenella corrodens* (*Letter*), 344
——, *et al*: Do steroid aerosols cause cataracts in asthmatic patients? (P), 845
Allergen challenge in mild atopic asthma, bronchial lavage and biopsy findings before and after (P), 812
challenge, late asthmatic response following, preceded by increase in non-specific bronchial responsiveness? (P), 811
dose, increase in, late asthmatic response induced in previous single early responders by (P), 809
generation of T cell derived neutrophil chemotactic factor induced by (P), 226
late reactions and cellular infiltration in upper respiratory tract induced by (P), 810
Allergic alveolitis, extrinsic, avian related, longitudinal course of (P), 824
bronchopulmonary aspergillosis, natamycin in treatment of, trial of (P), 860
Allergy, occupational, increased risk of, in smokers working in platinum refinery (P), 264
ALLIBONE RO. *See* GOSNEY JR, SISSONS MCJ, *et al*
Alpha$_1$-antitrypsin. *See* α_1-Antitrypsin
AL-SULEIMAN M. *See* GUNAWARDENA KA, AL-HASANI MK, *et al*
Alveolar cell carcinoma, acanthosis nigricans associated with, case of, 414
hypoventilation, primary, diaphragm conditioning by phrenic nerve pacing in case of, 1017
lipoproteinosis, idiopathic, lipoprotein macroaggregates in bronchoalveolar lavage fluid in, comparison with diffuse interstitial lung disease, 140; (*Letter*), 503
lipoproteinosis, pulmonary, complicating juvenile dermatomyositis, case of, 939
macrophages, activated, in subclinical pulmonary inflammation in collagen vascular diseases, 24
macrophages from patients with active sarcoidosis, diminished activity of tartrate resistant acid phosphatase in, 901
macrophages, human, enhanced H_2O_2 response to environmental hypoxia, time dependence of (P), 822
macrophages, human, inhibition of non-opsonised *Streptococcus pneumoniae* by (P), 863
macrophages, plasminogen activator production by, in normal subjects and in interstitial lung disease, 508
macrophages, pulmonary, tumour necrosis factor release by (P), 246
proteinosis, pulmonary, characteristic computed tomography appearances in (P), 812
surface area loss in relation to bronchiolar size and shape (P), 232
Alveolitis, allergic, extrinsic, avian related, longitudinal course of (P), 824
fibrosing, and sarcoidosis, H_2O_2 release from alveolar macrophages of patients with (P), 247
fibrosing, cryptogenic, and asbestosis, functional similarities of, 708
fibrosing, cryptogenic, cardiovascular function at rest and on exercise in, 276
fibrosing, cryptogenic, cyclophosphamide and low dosage prednisolone compared with prednisolone alone in treatment of (P), 824
fibrosing, exercise hypoxaemia in, $\dot{V}/\dot{Q}$ mismatch or diffusion defect? (P), 850
induced by drug (nomifensine), early neutrophil alveolitis after rechallenge in, case of, 647
ALVES VA. *See* KAIRALLA RA, CARVALHO CRR DE, *et al*
Amiloride, inhaled, effect on bronchial reactivity (P), 259
inhibition of histamine-induced constriction in bovine tracheal smooth muscle (P), 835
γ-Aminobutyric acid, role in human respiration, study using vigabatrin (P), 809
Aminohydroxypropylidene diphosphonate in effective treatment of hypercalcaemia due to lung cancer (P), 804
Amoxycillin and ciprofloxacin penetration into bronchial mucosa, evaluation of, 715
in lung secretions, immunoassay for measurement of (P), 863
penetration into sputum in patients with infective exacerbation of chronic bronchitis, influence of mucolytic agent (erdosteine), 585
Amylase, pleural effusions rich in, causes of (P), 224
Amyloidosis, renal, complicating sarcoidosis, case of, 422
Anaerobic lung infections, penicillin *v* clindamycin in treatment of (P), 827
Anaesthesia, local, before fibreoptic bronchoscopy, comparison of transcricoid and bronchoscopic routes for (P), 805
ANDERSON K, MORRISON SM, BOURKE S, BOYD G: Effect of cigarette smoking on the specific antibody response in pigeon fanciers, 798
——, *et al*: Breath carbon monoxide and the influence of smoking on the antibody response in pigeon fanciers (P), 242
——, *et al*: Effect of histamine on the power spectrum of lung sounds (P), 829
ANDERSON T. *See* STANLEY PRW, ANDERSON T, *et al*
Anderson-Fabrey disease, lung function abnormalities in (P), 829
ANDREWS JM. *See* HONEYBOURNE D, ANDREWS JM, *et al*
Angiitis, lympocytic, benign, and granulomatosis, case of, 649
Angiofollicular lymph node hyperplasia arising from intercostal space, case of, 337
Angiotensin converting enzyme activity in lung in rats with differing susceptibilities to chronic hypoxia, 703

Angiotropic large cell lymphoma presenting as interstitial lung disease, case of, 578
ÅNGSTRÖM T. *See* BJERMER L, ROSENHALL L, *et al*
ANNESI I. *See* KAUFFMANN F, NEUKIRCH F, *et al*
ANSARI MM. *See* BEG MH, REYAZUDDIN, *et al*
Anti-asthma therapy, inhaled, patterns of compliance with (P), 817
Antibiotics, high dose, effect on airway responsiveness in bronchiectasis (P), 223
Antibody response, specific, in pigeon fanciers, effect of cigarette smoking, 798
Antigen, sensitising, aerosol challenge with, effect on permeability of surface of rat trachea in life, 1007
Antigens, prawn, inhaled, antibody response to (P), 804
Antileucoprotease in developing fetal lung, 784
α_1-Antitrypsin deficiency screening of newborn children, psychosocial effects of, Swedish experience of (E), 505
Antituberculous therapy, compliance with, new method of measuring, evaluation of (P), 244
Antiviral treatment in chickenpox pneumonia, experience with, 627
Aorta, coarctation of, in children, left heart bypass in surgery of, 1003
Apnoea during sleep and bilateral diaphragm paralysis without diurnal respiratory failure, case of, 75
during sleep, syndrome of, effects of acetazolamide in, 115
during sleep, syndrome of, in Scotland, clinical features of (P), 254
obstructive, during sleep, plasma atrial natriuretic peptide levels in (P), 253
Apnoea/hypopnoea during sleep, syndrome of, peripheral oedema in (P), 851
Appendicitis, colobronchial fistula as late complication of, case of, 420
APPERLEY JF. *See* SUTEDJA TG, APPERLEY JF, *et al*
Argyrophil technique for nucleolar organiser region associated proteins in differentiation of malignant from normal and reactive mesothelial cells, 366
ARM JP, HORTON CE, MENCIA-HUERTA J-M, HOUSE F, EISER NM, CLARK TJH, SPUR BW, LEE TH: Effect of dietary supplementation with fish oil lipids on mild asthma, 84
——, *et al*: Effects of dietary supplementation with fish oil on the asthmatic responses to antigen (P), 809
Arm and leg ergometry in moderate chronic obstructive lung disease, comparison of, 911
ARMOUR CL. *See* BEREND N, PETERS MJ, *et al*
Armspan, relation to height, and prediction of lung function in children and adolescents, 657
ARMSTRONG RA, NEILL P, MOSSOP RT: Asthma induced by ivory dust: a new occupational cause, 737
Arteriovenous haemofiltration, continuous, in treatment of case of diuretic resistant cor pulmonale, 926
Arthritis, rheumatoid, small airways obstrucion in (P), 829
ASAOKA M, IMAIZUMI M, KAJITA M, UCHIDA T, NIIMI T, ABE T: One stage repair for an oesophageal fistula after pneumonectomy using an omental pedicle flap, 943
Asbestos, lung disease related to, relationship of lung function to ILO radiographic reading in, 777
lung disease related to, suspected, computed tomography scanning in evaluation of (P), 811
Asbestosis and cryptogenic fibrosing alveolitis, functional similarities of, 708
ASHBY JP. *See* HONEYBOURNE D, ANDREWS JM, *et al*
ASHCROFT T. *See* SWINBURN CR, JACKSON GJ, *et al*
ASHLEY S, CORLETT SK, WINDLE R, COOKSON JB: Colobronchial fistula: a late complication of appendicitis, 420
Aspergillosis, bronchopulmonary, allergic, natamycin in treatment of, trial of (P), 860
invasive, in neutropenia, apparent pulmonary mycetoma following, 108
Aspergillus fumigatus, asthmatic patients sensitised and non-sensitised to, fungal handling by phagocytic cells from (P), 224
fumigatus, effect of corticosteroid treatment on ability of phagocytes from asthmatics to kill (P), 248
Aspiration biopsy, fine needle, compared with fibreoptic bronchoscopy in investigation of peripheral pulmonary opacities (P), 221
biopsy, fine needle, in diagnosis of lung cancer, prospective evaluation, 540
biopsy, fine needle, of lung, bleeding as complication of, 2 cases, 1013
Aspirin, asthmatics intolerant of, effect of fish oil enriched diet, 93
Asthma, acute, bronchial reactivity in patients recovering from (P), 825
acute, oxygen derived free radical production in, circulating markers of (P), 813
acute, rate of change in mean peak flow and diurnal variation in peak flow in patients recovering from (P), 825
airway calibre and reactivity in, dose related effects of salbutamol and ipratropium bromide on, 300
airway responses to inhaled ouabain and effect of Na/K ATPase inhibition on histamine responsiveness in (P), 868
airway responsiveness in, comparative effects of prednisone and beclomethasone dipropionate, 378
airway responsiveness to methacholine in subjects with and without, analysis of morning-evening changes using partial flow-volume curves, 727
and chronic bronchitis, airway calibre and bronchial reactivity in, comparison of effects of ipratropium and salbutamol (P), 826
and pregnancy, prospective study of 198 pregnancies, 12
associated with wheat, study of seasonal variation in non-specific bronchial reactivity in wheat workers with history of, 103
atopic, adult, effect of house dust mite avoidance measures, 98
atopic, mild, allergen challenge in, bronchial lavage and biopsy findings before and after (P), 812
attacks, speed of onset and domiciliary treatment of, assessment from prospective measurement of peak expiratory flow rate (P), 844
beta adrenoceptor responsiveness to inhaled salbutamol in (P), 843
breathlessness during exercise in, perception of, improvement by physical training (P), 237
bronchial mucous membrane mast cells and eosinophils in (P), 238
bronchoalveolar lavage fluid inflammatory cells in, number and activity and relation to airway responsiveness, 684
bronchoconstrictor response to hypertonic saline and exercise in, effect of terfenadine (P), 865
cardiovascular fitness after exercise rehabilitation programme in, analysis of factors improving (P), 846
cataracts in, caused by steroid aerosols? (P), 845
cell mediated immune reaction as contribution to (P), 813
childhood, severity of, assessment in outpatients (P), 825
chronic, effect of particle size of bronchodilator aerosols on lung distribution and pulmonary function in (*Letter*), 159
chronic, prazosin in treatment of, 385
comparison of inhaled salmeterol with salbutamol in adults with, 674
epidemiology, study of, reasons for (E), 425; (*Letters*), 1024
exacerbations of, and viral respiratory tract infection in adults, 679
exacerbations of, yoga breathing during, increased muscle enzyme activity after, case of, 731; *Errata*, 1028
exercise performance in, maximum, effect of nebulised salbutamol (P), 846
extrinsic, bronchoconstriction induced by histamine and leukotriene C4 in, effect of azelastine, 306
fatal, airway inflammation in (P), 238
fish oil in (E), 81
home visiting by nurse for children with, cost-benefit analysis (P), 252
in children, comparison of community surveys in UK (P), 258
in relation to smoking habits, prospective study in 14 729 adults, 534
induced by exercise, circulating adrenaline and noradrenaline concentrations during exercise in, 295
induced by exercise, effect of controlling inspired air temperature (P), 250
induced by exercise, felodipine modification of (P), 251
induced by exercise, nebulised nedocromil sodium in, dose-duration effect of (P), 832
induced by exercise, prevention of, comparison of efficiency of methylcellulose and cromoglycate (P), 234

induced by hyperventilation, role of airway cooling and drying in, 289
lymphocyte subsets in bronchoalveolar lavage fluid in (P), 228
management in general practice, assessment of programme for (P), 253
management in general practice, survey of (P), 253
mild, effect of dietary supplementation with fish oil lipids, 84
moderate to severe, nedocromil in (P), 250
morbidity of, reduction by high dose inhaled therapy, trial of (P), 252
nasal response to exercise and exercise induced bronchoconstriction in, 890
nedocromil sodium in adult patients requiring maintenance oral corticosteroids, absence of steroid sparing effect, 982
neutrophil metabolic activity in, luminol amplified chemiluminescence as marker of (P), 248
nocturnal, caused by aspiration of saliva? (P), 833
nocturnal, caused by changes in airway cholinergic activity?, 720
nocturnal cough and airway lability in (P), 826
nocturnal, effects of vagal activity and plasma adrenaline in (P), 261
non-atopic, bronchoconstriction induced by AMP in, effect of oral terfenadine alone and with flurbiprofen (P), 814
not controlled by salbutamol, theophylline or inhaled steroid next choice for? (P), 845
occupational, diagnosis of, value of serial peak flow recordings in (P), 803
occupational, due to bleach activating agent (P), 264
occupational, due to oil mists, 200
occupational, due to sodium iso-nonanoyl oxybenzene sulphonate in detergent research worker, 501
occupational, in workers of pharmaceutical company processing spiramycin, 371
occupational, induced by ivory dust, African case of, 737
patients, ability to use metered dose inhaler and powder inhaler during relapse, comparison of (P), 815
patients intolerant of aspirin, effect of fish oil enriched diet, 93
patients sensitised and non-sensitised to *Aspergillus fumigatus*, fungal handling by phagocytic cells from (P), 224
patterns in general practice (P), 830
pre-school, budesonide via Nebuhaler in, trial of (P), 845
prevalence of, related symptoms, and school absence in children aged 5–11 years (P), 258
propranolol inhalation challenge in relation to histamine response in children with, 451
pulmonary inflation in young children with, effect of budesonide, 937
recurrent, induced by toluene diisocyanate, case of, 660
relation between membrane fatty acids and leucocyte ionised calcium in (P), 867
salbutamol in, 4 mg and 8 mg oral controlled release formulations of, single dose and steady state pharmacokinetics of (P), 843
severe, acute, nebulised ipratropium to be added to salbutamol in? (P), 249
severe, acute, subcutaneous adrenaline versus terbutaline in treatment of, 19
severe, acute, systemic salbutamol plasma concentrations in, excessive? (P), 844
severe, acute, T lymphocyte activation in, accompanied by elevated serum concentrations of interferon and soluble interleukin-2 receptor (P), 814
severe, acute, T lymphocyte activation in, implications for disease pathogenesis and management (P), 238
severity of, assessment in group of primary schoolchildren (P), 825
stable, chronic, bronchodilator response and deposition patterns in response to nebulised particles with different breathing patterns in (P), 815
stable, chronic, metered dose inhaler salbutamol in, dose-response study (P), 249
stable, different breathing patterns in patients with, bronchodilator responses to nebulised particles and deposition patterns with, 987
symptoms of, relationship to peak flow variability (P), 220
uncomplicated, hospital management of cases of, comparison with patients with diagnostic label of "chronic obstructive airways disease" (P), 830
work performance in, assessment for determination of cardiorespiratory fitness and training capacity, 745
Asthmatic response, late, and changes in airway responsiveness, falls in blood eosinophils correlated with (P), 237
response, late, following allergen challenge, preceded by increase in non-specific bronchial responsiveness? (P), 811
response, late, induced in previous single early responders by increase in allergen dose (P), 809
response, late, or associated changes in blood eosinophils, no correlation with blood cortisol concentrations (P), 810
responses, late, identification of, statistical aids in (P), 866
responses to antigen, effect of dietary supplementation with fish oil (P), 809
responsiveness, early, and late asthmatic response, factors predicting (P), 260
Atenolol, airways selectivity of (P), 832
Atopy, relationship to bronchial responsiveness in extended families (P), 219
Atrial fibrillation, paroxysmal, mediastinal bronchogenic cyst presenting with, left atrial compression by, case of, 216
natriuretic peptide, cardiac and plasma levels in rats during chronic hypoxia and recovery (P), 853
natriuretic peptide gene expression in cardiac muscle of rat extrapulmonary and intrapulmonary veins, 44
natriuretic peptide levels in decompensated and treated cor pulmonale (P), 242
Atrovent nebuliser solution, efficacy of, comparison with preservative free ipratropium bromide, 446
AYRES JG, CROCKER JG, SKILBECK NQ: Differentiation of malignant from normal and reactive mesothelial cells by argyrophil technique for nucleolar organiser region associated proteins, 366
Azelastine, effect on bronchoconstriction induced by histamine and leukotriene C4 in extrinsinc asthma, 306
Azelastine hydrochloride, effect on histamine and allergen induced bronchoconstriction in asthmatic subjects (P), 220

B

B cell malignant lymphoma, primary, of trachea, case of, 497
Bacterial flora of bronchiectatic secretions (P), 862
products, stimulation of neutrophil locomotion *in vitro* by (P), 223
Bacteroides melaninogenicus, pericarditis secondary to teratoma due to, case of, 341
